Architecture & Design

Our goal is to deliver software solutions that achieve a high rate of user adoption.

We take an approach that engages key users and stakeholders early in the application development process.

- Software Architecture
- User Requirements Gathering
- Requirements Management and Analysis
- Requirements Traceability Management
- Wireframe Designs
- Clickable Prototypes
- User Requirements Capture/Management

Application Modernization

As technology continues to advance, legacy applications become incompatible with new technologies like cloud, mobile, and analytics. This can limit your organization’s ability to benefit from advances in technology and hinder digital transformation.

We can help your organization to modernize legacy applications using an incremental, low risk approach. This includes modernizing legacy architecture to cloud native and modernization of user interfaces.

- Modernization Planning and Consultation
- Modernization Project Management
- Re-architect Applications from Legacy Cloud Native
- Test Planning and Management for migrated applications
- User Experience Redesign
Custom Application & Mobile Development

Vidoori follows a rigorous process associated with best practices for software development. The rigor of our approach does not stifle innovation or limit the use of agile methodologies for development. Instead, it infuses our work with industry best practices and ensures that we produce high quality products.

Combining our innovation, agile methodologies, and process discipline enhances our ability to provide realistic timelines and estimates for release dates.

- Open Source
- Microsoft
- Content Management Systems
- Customer Relationship Management Systems
- Custom SharePoint Development
- Tableau, Salesforce, Atlassian Suite (i.e. JIRA)
- iOS & Android Native
- jQuery Mobile

Data Management and Development

Vidoori follows a rigorous process associated with best practices for software development. The rigor of our approach does not stifle innovation or limit the use of agile methodologies for development. Instead, it infuses our work with industry best practices and ensures that we produce high quality products.

Combining our innovation, agile methodologies, and process discipline enhances our ability to provide realistic timelines and estimates for release dates.

- SQL Server
- Oracle
- MySQL
- NoSQL
Data Integration

Vidoori follows a rigorous process associated with best practices for software development. The rigor of our approach does not stifle innovation or limit the use of agile methodologies for development. Instead, it infuses our work with industry best practices and ensures that we produce high quality products.

Combining our innovation, agile methodologies, and process discipline enhances our ability to provide realistic timelines and estimates for release dates.

- Custom API Development
- Integration via use of existing system APIs
- Dashboards featuring data from multiple integrated data sources
- SSRS
- BI/Analytics
- Google Charts
- Business Objects

About Vidoori

Vidoori, Inc. is a consulting firm that provides high quality information technology services and products to solve business and technical problems for commercial and international clients along with the U.S. Federal Government.

The Vidoori approach utilizes an unyielding focus on achieving measurable results, reducing cost and introducing innovative solutions that use industry best practices.

For an initial assessment regarding how Vidoori integration and test solutions can support your organization, please contact a member of the Vidoori Software Development team.
